AKSHAD ALI

Full Stack Developer (MERN) | Node.js, Express.js, MongoDB, PostgreSQL & React.js | Available Immediately

Noida, India | +91 7903909883 | akshadali2977@gmail.com | linkedin.com/in/akshad-ali | Portfolio | github.com/erakshadali

PROFESSIONAL SUMMARY

2026 B.Tech CSE graduate and Full Stack Developer (MERN) building REST APIs and web applications with Node.js, Express.js, MongoDB and PostgreSQL, and responsive React.js/Next.js and TypeScript front ends. 6 months of hands-on trainee experience, 4 deployed projects with CI/CD on Vercel, and unit testing with Vitest. Comfortable with RESTful API design, client and server-side validation, component-based architecture and Git workflows. Quick learner with a focus on clean, tested, maintainable code.

TECHNICAL SKILLS

Backend & Database: Node.js, Express.js, RESTful API Design & Integration, MongoDB, PostgreSQL (Neon), SQL, Server-side Validation
Frontend: React.js, Next.js, React Router, Context API, Tailwind CSS, Responsive Web Design, Component-Based Architecture, State Management
Languages: JavaScript (ES6+), TypeScript, Java, C, HTML5, CSS3
Tools & Platforms: Git, GitHub, Visual Studio Code, Claude Code, Vercel, Netlify, Render, Vitest (unit testing), Lighthouse, CI/CD (Vercel Git-based)
Soft Skills: Problem Solving, Self-Learning, Team Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer (Trainee) *Jan 2026 – Jun 2026*
DigiCoders Technologies Private Limited

- Built full-stack MERN features: Node.js/Express.js REST endpoints backed by MongoDB, connected to React.js screens that consume the APIs.
- Developed responsive, cross-browser interfaces with React.js, HTML5, CSS3, JavaScript (ES6+) and Tailwind CSS, converting UI/UX designs into reusable components.
- Wrote readable, documented code and managed changes through Git/GitHub version-control workflows.
- Worked with designers and senior developers in an agile team, delivering assigned features on schedule.

PROJECTS

Travel With Dreams | *React.js, Vite, Express.js, PostgreSQL, REST API* | Live | GitHub

- Built a full-stack travel booking site: an Express.js REST API for trips, destinations, bookings and enquiries storing data in Neon PostgreSQL, with a React 19 + Vite frontend.
- Validated booking and enquiry forms on both client and server; deployed on Vercel with CI/CD through GitHub.
- Implemented URL-synced trip filters, an image lightbox gallery, day-by-day itineraries and a live price calculator.

Job Application Tracker | *Next.js, TypeScript, Tailwind CSS, Vitest* | Live | GitHub

- Built a Next.js (App Router) and TypeScript (strict) app to track job applications with status updates, search, filter and CSV export; use it daily to manage 300+ of my own applications.
- Wrote 6 Vitest unit tests covering filtering, stats and CSV logic; built a localStorage hook using useSyncExternalStore.
- Fixed a production build failure caused by reading the clock during prerender; lint, type-check and build now pass.

Movie Selector App | *React.js, React Router, Context API, TMDB REST API* | Live | GitHub

- Built a responsive movie discovery app in React.js that fetches live data from the TMDB REST API; deployed on Vercel with CI/CD and API keys kept in environment variables.
- Implemented client-side routing with React Router, including dynamic movie detail pages, and used the Context API for a favorites feature persisted in localStorage.
- Handled async fetching (useEffect, async/await) with loading and error states; built a responsive CSS Grid layout for mobile, tablet and desktop.

Personal Portfolio Website | *HTML5, CSS3, JavaScript* | Live | GitHub

- Built a mobile-first portfolio in HTML5, CSS3 and vanilla JavaScript; Lighthouse (mobile): 84 performance, 96 accessibility, 100 best practices, 100 SEO.
- Added an asynchronous contact form and set up Vercel Git-based CI/CD so every push to main deploys automatically.

EDUCATION

Bachelor of Technology, Computer Science *2022 – 2026*
Integral University, Lucknow, India
